- Tamil

PROFILE

Motivated and detail-oriented Junior Java Developer with strong knowledge of core Java, object-oriented programming, and data structures. Hands-on experience in building Java applications using Spring Boot, JDBC, and MySQL through academic projects and internship training.

PROJECTS

TuneHub   2024
Music Streaming Web Application

- Developed a full-stack music streaming platform using Java, Spring Boot, and MySQL. Implemented user registration, login authentication, and role-based access for admin and users. Admins can add or manage songs, while users can browse and create personalized playlists. Integrated responsive front-end using HTML, CSS, and basic JavaScript.

Drug Shipment   2023
Desktop Application

- The Drug Shipment Management System is a Java-based desktop application designed to streamline the management of drug inventory and shipments. Built using Java, JDBC, MySQL, and Java Swing, the app allows pharmacy staff to track drug details, manage suppliers, and monitor shipment status. It features CRUD operations, real-time data updates, and a user-friendly interface. The system enhances operational efficiency by automating manual tracking, ensuring timely deliveries, and maintaining accurate records of drug distribution and supplier transactions.

EDUCATION

Bachelor of Computer Application
Nutan Institute of Management   2020-2023
GPA: 7.5

SSLC
Siddeshwara high school   2018
GPA: 8.5
